

Manufacturing and Installation Of Equipments for Food Processing, Edible Oil, Pharmaceuticals & Chemical Industries.

SHALAX
PROCESS EQUIPMENTS

ABOUT

Introducing Shalax Process Equipments, one of the best equipment manufacturing firms in India that specializes in designing, manufacturing and delivering bespoke engineering components for generic industries like pharmaceuticals, chemical, and oils & gas in compliance with Global Standards for betterment of production & quality.

 **Establishment Year**

2010

 **Plant Area**

**10000 Sq. Ft.
(10T EOT
Crane)**

 **Team**

31+

 **Innovative Solutions**

100+

 **Project Delivery**

250+

VISION

- To become the top sustainable engineering solutions and process optimization methodologies providing firm for every generic industry.

MISSION

Developing creative & eco-friendly engineering solutions and delivering it with reliability and affordability for maximizing the ROI of the clientele is our priority.

We invest in innovation.

DESIGN FACILITY

Shalax Process Equipments banks on innovative designs and flawless engineering. We are always evolving with time using latest technologies, automated software and advanced resource integrations. This enables us to provide veritable & prolific industrial & sustenance solutions to our clientele. We also abide by the standards for producing the most efficient & safe Equipments for various generic industries.

We comply with **IS, ASME, DIN, API, TEMA** standards for engineering designs.

- Efficient mechanical blueprints par excellence with comprehensive engineering infrastructure
- For flawless machine designing authentic software like Chem CAD, AutoCAD & PV Elite are used. In special cases usage of bespoke utility software is opted for.
- Outsourcing of Finite Element Analysis & thermal machine designing

QUALITY

People, Product, Performance

The following Non Destructive Examinations are carried out by qualified personnel from ANSI level II as per ASME standards.

- Ultrasonic testing
- Dye Penetrate testing
- Radiography testing
- Magnetic Particle testing
- Vacuum Testing
- Positive material identification

QUALITY

Third party inspection

An inspection document folder is submitted along with supply.

We are equipped to manufacture various components and equipments in accordance with Standards and Third party inspection like Bureau Veritas, Lloyds, Quest, etc

Attention is paid to provide adequate machine shop backup to meet the stringent requirement of machining for all projects.

Erection and Commissioning – ON SITE Custom services

SPE specializes in process and utility piping, equipment installation, custom fabrication and the installation of structural components. Offering a complete array of services to fit any goal, timeline, and budget, SPE will apply their decades of experience to plan your project from beginning to end thoughtfully.

Our team of experts has a comprehensive understanding of material selection and costs. As a result, projects can be fully modeled along with detailed production schedules and documentation of all materials, welds, and inspections.

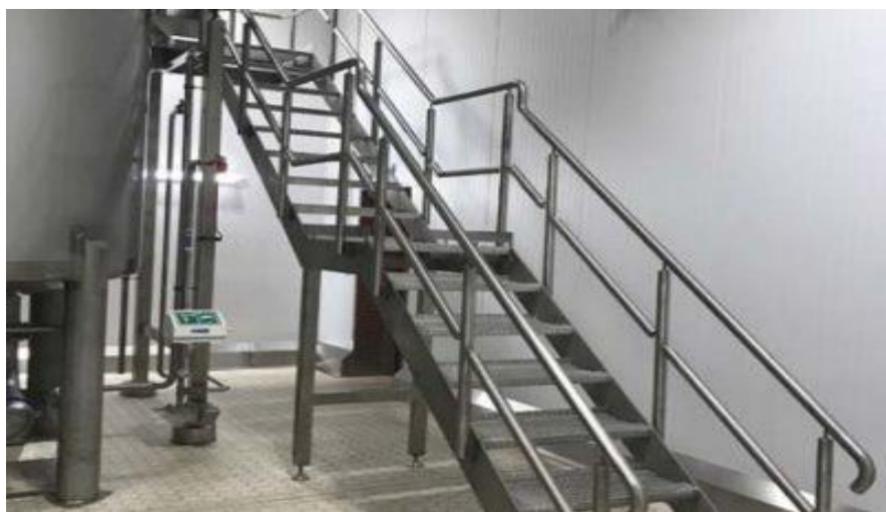

We also Trade with the all Industrial Products and Solutions to cater the ON SITE needs.

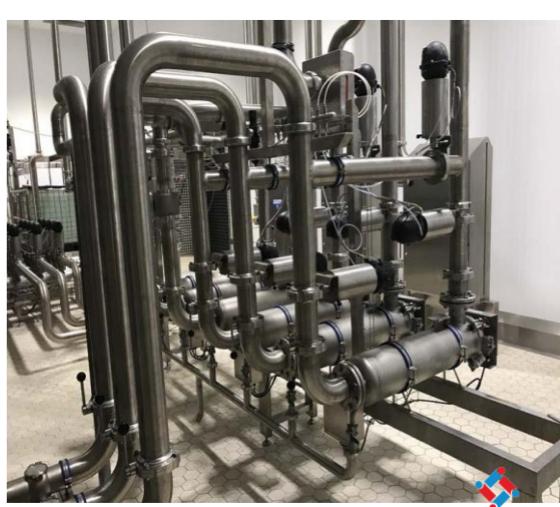

Specific services include:

- ✓ Piping Fabrication
- ✓ Process Piping
- ✓ Utility Piping
- ✓ Equipment Installation
